

TAKE CONTROL OF YOUR SAFETY

Remote Section Blocking is the use of AzLM functionality to facilitate the blocking of a section at the start of possessions and unblocking at the end of possessions.

Benefits:

- Workers in charge of their own safety
- Isolate the system - Extra safety net – Confirmation from Signaller
- Block & Unblock sections more easily and without having to travel to ACE locations
- Can see live information
 - ✓ Who blocked it, When, Why, Type of block
- Cost saving:
 - ✓ Night shift starts work properly after 2am. 90 minutes is wasted from 5 hour window
 - ✓ More work can be undertaken by working the full 5 hours
